

Applicant : Brian Sullivan et al.
Serial No. : 09/750,027
Filed : December 29, 2000
Page : 12

Attorney's Docket No.: 06975-079001 / Network 03

request is anticipated based at least on information that is not particular to any single first access requestor. The selected electronic information from within the source storage medium is accessed and duplicated on a destination storage medium that is more accessible to the access requestors than the source storage medium. The access requestors are thereafter provided with access to the selected electronic information that has been duplicated on the destination storage medium.
